

Processing & Diversion Matrix

Ecovim Model #	Gross Daily Diversion	Gross Annual Diversion	Annual HCO* Production	Net Annual Diversion	Annual Water Production
Eco 66	66 pounds	12 tons	2 tons	10 tons	2,400 gals.
Eco 250	250 pounds	45 tons	5 tons	40 tons	9,000 gals.
Eco 650	650 pounds	118 tons	13 tons	105 tons	24,000 gals.
Eco 1100	1,100 pounds	200 tons	20 tons	180 tons	40,000 gals.
Eco 2200	2,200 pounds	400 tons	40 tons	360 tons	80,000 gals.
Eco 3300	3,300 pounds	600 tons	60 tons	540 tons	120,000 gals.

Gross Daily Diversion: Amount of food waste processed daily.

Gross Annual Diversion: Amount of food waste processed in one year.

***Annual HCO Production:** Amount of food waste processed into **Highly Concentrated Organics** per year. Output can be put in landfills, diverted to landscape as a soil additive or compressed to burn as fuel.

Net Annual Diversion: Amount of food waste NOT put into landfills.

Annual Water Production: Amount of potable water produced by the system in one year for recycle or reuse.
